Project summary

The general objective of the project is to foster Serbian innovative capacity by modernizing Serbian HE system and providing sustainable source of high-quality human resources. The project will achieve this by developing and realizing interdisciplinary postgraduate curricula in the field of innovation management based on best practice from existing EU study programs and according to the Bologna requirements at Serbian HE.

The specific objectives are:

1. To develop and implement interdisciplinary PhD program in innovation management as a joint degree of 4 Serbian universities,
2. To develop and implement interdisciplinary master program in innovation management as a joint degree of 4 Serbian universities,
3. To develop and implement certified innovation management courses for industry professionals to enable career development and increase employability.

These objectives should be achieved through synergetic partnership of 3 Serbian public and 1 private university, 1 college of applied sciences, 6 organizations representing key Serbian stakeholders, 4 well known EU universities and 2 non-academic EU partners with extensive experience in dealing with innovation and curriculum development.

The principal outcomes will include defined structures, research and teaching contents of curricula for joint degree PhD and master programs in innovation management, their accreditation and realization, developed and implemented set of LLL courses for professionals, updated teachers' and trainers' skills, introduced interdisciplinary and practical oriented teaching approach, established laboratory and virtual learning environment, published new books, realized teachers and students mobilities, and established Serbian Innovation Management Council.

These results will provide infrastructural resources necessary to secure project sustainability beyond its lifetime. Results and best practice will be actively diffused and exploited at national, regional and European level.

Objectives

1. To develop and implement interdisciplinary PhD program in innovation management as a joint degree of 4 Serbian universities,
2. To develop and implement interdisciplinary master program in innovation management as a joint degree of 4 Serbian universities,
3. To develop and implement certified innovation management courses for industry professionals to enable career development and increase employability.

Deliverables

Title	Type	To
1.1 Report on best practice from EU	Report	May 31, 2014
1.2 Report on local need assessment	Report	May 31, 2014
1.3 Developed postgraduate curricula	Other products	October 31, 2014
1.4 Developed set of LLL courses	Other products	December 31, 2014
2.1 Serbian staff retrained in the EU partners	Training	June 30, 2015
2.2 New teaching materials developed and published	Teaching material	August 31, 2015
2.3 New LLL course materials prepared and published	Teaching material	September 30, 2015
2.4 iLab established	Learning resources	March 31, 2014
2.5 Books purchased and translated	Teaching material	July 31, 2015
3.1 Master and PhD students enrolled	Other products	September 30, 2015
3.2 Master program realised	Training	September 30, 2016
3.3 PhD program realised (teaching part)	Training	November 15, 2016
3.4 LLL courses realised	Training	October 31, 2016
3.5 Students' visits to EU partners realised	Other products	September 30, 2016
4.1 Web site developed and maintained	Other products	November 30, 2016
4.2 Promo material developed and published	Other products	July 31, 2016

4.3 Developed programs advertised and promoted	Other products	November 30, 2016
4.4 Dissemination and networking events organized	Events: Conferences and Seminars	October 31, 2016
4.5 Annual doctoral students conference started	Events: Conferences and Seminars	October 31, 2016
5.1 Study programs (PhD and master) accredited	Other products	May 31, 2015
5.2 LLL programs certified	Other products	July 31, 2015
5.3 iLab engaged in collaboration with industry	Other products	November 30, 2016
5.4 Serbian Innovation Management Council established	Other products	May 31, 2015
6.1 Quality control mechanisms developed	Methodology	February 28, 2014
6.2 Internal and external peer reviews completed	Report	November 30, 2016
6.3 Realized programs evaluated by students & trainees	Report	October 31, 2016
6.4 Exchanged best practice with other Tempus projects	Other products	June 30, 2016
7.1 Project management meetings organised and realised	Report	October 31, 2016
7.2 Project management procedures developed	Methodology	February 28, 2014
7.3 Project activities managed and reported	Report	November 30, 2016
